JACKSONVILLE FIRE AND RESCUE DEPARTMENT

January 27, 2014

The City of Jacksonville and the Jacksonville Fire and Rescue Department (JFRD) are pleased to announce the opening of Fire Station 62 located at 14279 Bartram Park Blvd, Jacksonville, FL, 32258.

FS 62 was placed in service Jan. 27, 2014 and houses Engine 62, a Class "A" 1,500 GPM pumper that meets the Insurance Services Office (ISO) Fire Suppression Rating Schedule requirements for first arriving engine companies. ISO rates fire departments and then makes that rating available to insurance companies for use in determining property insurance premiums.

For Jacksonville, ISO has determined that if your property is within 5 road miles of an ISO-recognized fire station and is within 1,000 feet of a fire hydrant, then your Public Protection Classification or PPC is 3. This is the best classification in the City of Jacksonville. If your property is within 5 road miles of the fire station, but is beyond 1,000 feet of a hydrant, then the PPC will be 8B. If your property is beyond 5 road miles of the fire station, the PPC is 10 regardless of proximity to a fire hydrant.

JFRD does not currently have the ability to certify distances from fire stations or fire hydrants to individual property addresses, nor does JFRD draft letters concerning such.

JFRD is a professional paid municipal fire department with more than 1,200 members. JFRD does not publish or provide telephone numbers to individual fire stations. If you have an emergency, dial 911.
