**6.102 Authority and Intent**

The Board promulgates this rule for the purpose of implementing the intent of the City Council as declared in Ordinance 84-674-684, City Code. Jacksonville has been in violation of the State and Federal standards established to protect the public from the adverse health effects caused by exposure to high concentrations of ozone. The major source of the pollutants which form ozone is the motor vehicle. The Board recognizes that the Federal Motor Vehicle Control Program, Title 40 CFR, Part 86, as amended, requires that new motor vehicles meet specified emission standards and intends that this rule further the public interest by requiring that air pollution control devices installed on motor vehicles by the manufacturers be maintained and that in-use motor vehicles meet the emission limits established in this rule. [History: New, Effective 1/10/93]

### **6.103 Severability**

The provisions of these mobile source rules are severable. If one or more of the provisions should be invalidated, the Board intends that the other portions should become effective or remain in effect. [History: New, Effective 1/10/93]

### **6.104 Enforcement**

This rule shall be enforced by the Division in accordance with the provisions of Chapter 360 and 362, Ordinance Code. [History: New, Effective 1/10/93]

### **6.105 Investigations - Right of Entry**
