

Online Crime Mapping Program Reference Guide

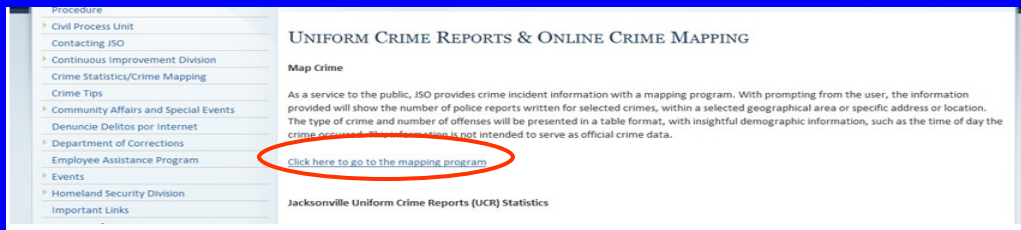

The goal of JSO's new online crime mapping program is to inform the citizens of Jacksonville about criminal incidents throughout the community. This document serves as a reference guide to navigating the application. Keep in mind that the data in the application has been filtered to exclude sex crimes, child abuse, and other crime information protected by statute or reported by other agencies.

ACCESSING THE JSO CRIME MAPPING SITE

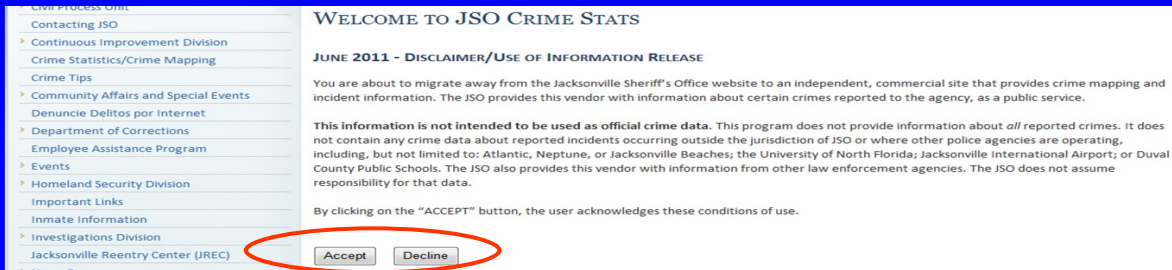

To access the site you can go directly to www.jaxsheriff.org and click on Crime Statistics/Crime Mapping on the left hand side of the page.

You will be directed to the UCR & Online Crime Mapping page. Click the link for Crime Mapping

A disclaimer page will appear and you must accept the terms to proceed to the site.

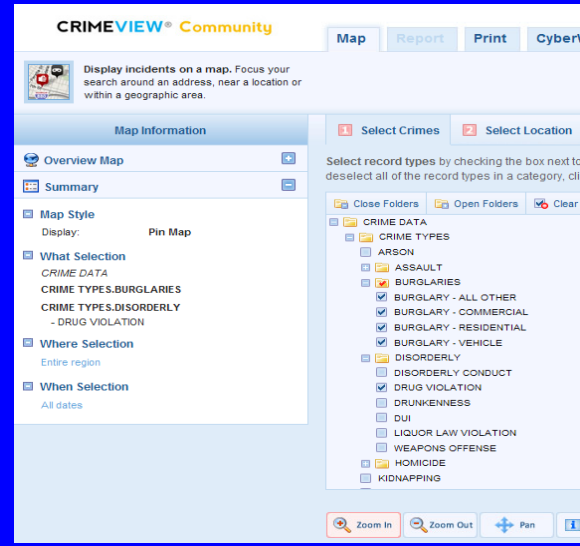

The application will open and look something like this.

USING THE JSO CRIME MAPPING SITE

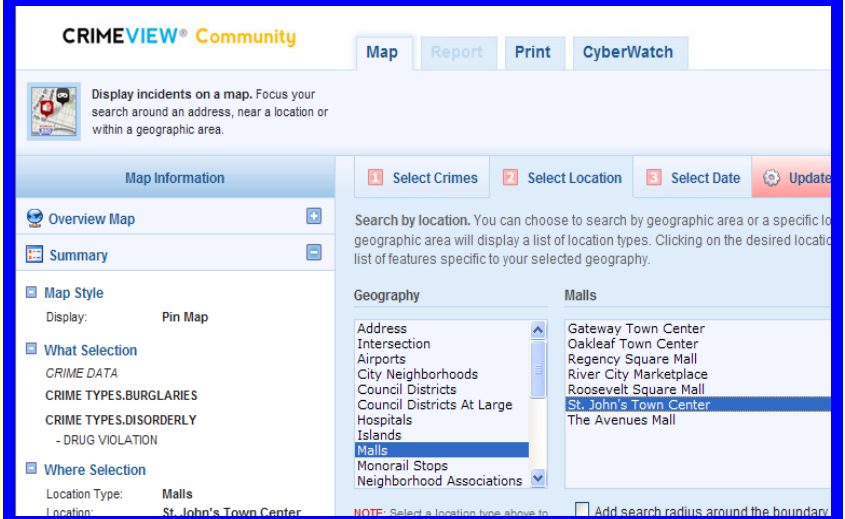

Step 1: Select Crime Type

The user can click folders to choose the entire group of crimes or expand the folder to select specific crime types.

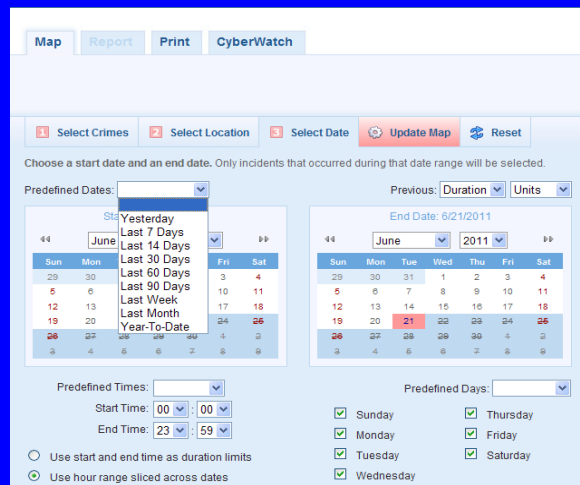

Step 2: Select Location

There are a number of options for selecting the location. As the user selects a geography type, the specific locations appear to the right. The user can also define a search radius around the selected location.

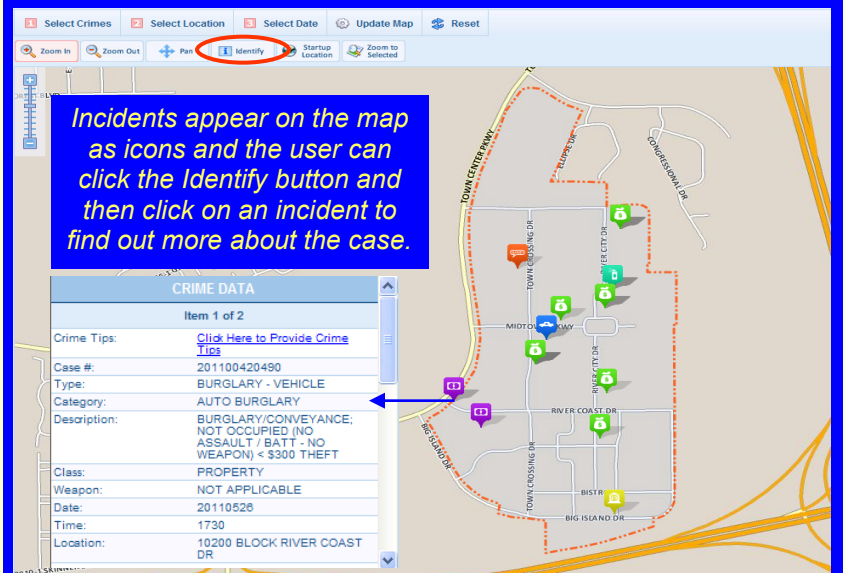

Step 3: Select Date/Time

The user can choose the dates and times by either using a calendar control (similar to online registration sites) or standard drop-down values.

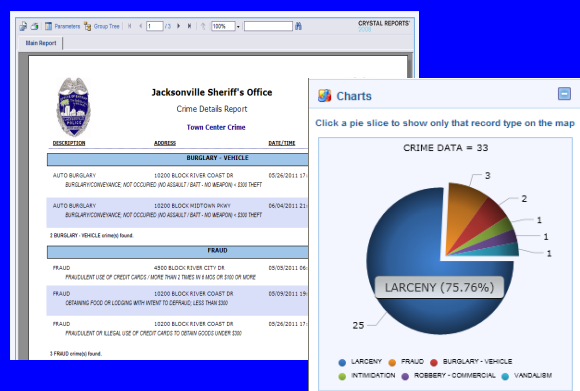

Step 4: Update Map and View Results

By clicking the Update Map tab, the map is produced.

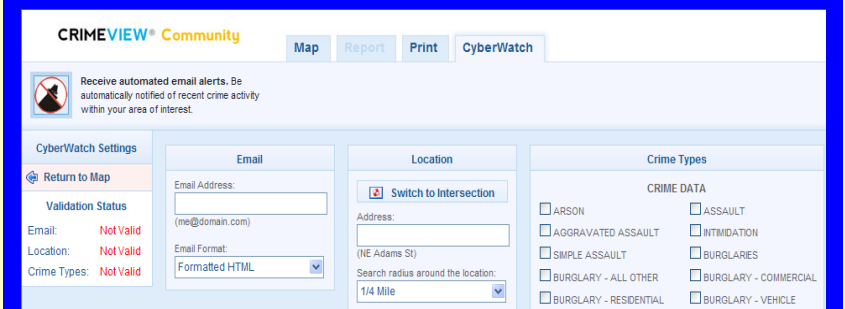

Reports/Graphs:

The user can produce reports and visualize graphs for their geographic selections.

CyberWatch Setup:

The user can click on the CyberWatch tab to set up automated email alerts. A search radius can also be designed to include areas around a particular location.

Note: Selecting all crime types with a 1-mile radius may produce considerable email traffic.
