---

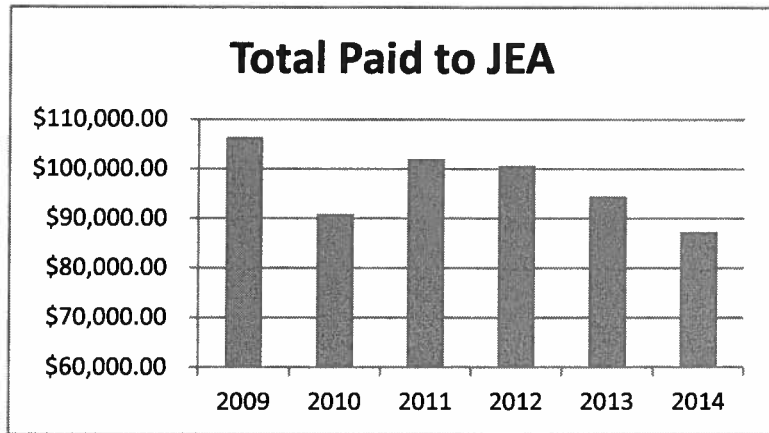

For your information I have attached the previous 6 years of energy consumption for the Police and Fire Pension Fund building and parking facility. As you can see the energy cost has decreased consistently over the last three years. This cost decrease has saved the Police and Fire Pension Fund over \$10,000 in this short time period.

These savings are due to the replacement of light fixtures in the parking facility and building with LED lighting and by adding photo sensors in all offices throughout the building. The photo sensors prevent lights being left on by tenants while the building is not occupied which has been an issue in the past.

I am constantly seeking other ways to save the Police and Fire Pension Fund money.
