Wednesday, August 9, 2023-2 PM

## MINUTES

MEMBERS PRESENT<br>Valerie Gutierrez, Chair<br>Robert Blanco<br>Becky Javurek<br>Kent Mathis<br>Sage Sullivan<br>Lakeisha Williams

## MEMBERS NOT PRESENT

James Healy, Vice Chair
STAFF PRESENT
John Sawyer, OGC (via Zoom)
Andy Robinson, Pension Administrator
Hannah Wells, Assistant Pension Administrator

## OTHERS PRESENT

Jacquelyn Y Brown

## 1. CALL TO ORDER

Chair Gutierrez called the meeting to order at about 2:03 PM.

## 2. PUBLIC COMMENTS

Ms. Brown requested a copy of the rules the PAC follows. Chair Gutierrez and Mr. Robinson held a discussion with Ms. Brown regarding the municipal code and board rules. Ms. Brown discussed rule number 7 and how she felt the PAC violated the rule. She specified that JEA approved her disabled child to stay on her insurance for life. Mr. Sawyer stated that this section is only for public comment and that the PAC and Ms. Brown could continue the discussion under Old Business, once it was time to review her case.

## 3. APPROVAL OF MINUTES

Mr. Blanco motioned to approve the minutes. Ms. Sullivan seconded the motion. The Chair summoned for discussion and given none took a vote. The motion passed unanimously.

## 4. NEW BUSINESS

a. Consent

Mr. Mathis motioned to approve the consent. Mr. Blanco seconded the motion. The Chair summoned for discussion. Mr. Mathis inquired when the previously approved disabled child benefit would show on the consent agenda. Mr. Robinson explained that Mr. Moody would show on the next consent agenda due to having to be approved by the BOT before going into pay status. Given no further discussion, the Chair took a vote. The motion passed unanimously.

## 5. OLD BUSINESS

## a. Review of Pension Eligibility Case

Chair Gutierrez informed the PAC they needed to move forward to approve or deny Mr. Hogan's pension eligibility case. Mr. Robinson notified the committee that Mr. Hogan would not be present but could move forward with the decision. Chair Gutierrez opened the floor to a discussion to review Mr. Hogan's case.

Mr. Mathis asked if the PAC could get clarification of the recommendation from the Office of General Counsel. Mr. Sawyer summarized the legal documents provided and explained why Mr. Hogan could not join the pension plan due to FRS DROP regulations. Mr. Sawyer stated that once a member joins FRS DROP they are not allowed to exit FRS and the recommendation from Office of General Counsel is to deny Mr. Hogans request to join the pension plan. Mr. Mathis thanked Mr. Sawyer.

Mr. Blanco motioned to deny Mr. Hogan's request to join the pension plan. Mr. Mathis seconded the motion. The Chair summoned for discussion and given none took a vote. The motion passed unanimously.

Mr. Sawyer states Mr. Hogan now has 30 days to appeal the denial if he chooses.

## b. Review of adult disabled child survivor benefit

Mr. Robinson reviewed Ms. Brown's public comment from the last PAC meeting and provided an overview of the prior PAC meeting from 2022 where her request was denied. Mr. Robinson stated that the pension office neglected to send out the denial letter at that time but would need a vote from the PAC to deny the benefit and send out the denial letter and allow Ms. Brown to appeal the denial if she wished.

Chair Gutierrez explained the differences between Ms. Brown's case versus the disabled child case that the PAC heard at the prior meeting that was approved. Chair Gutierrez specified in Mr. Moody's case, the PAC was correcting what was done from 2006, where Ms. Brown is coming to the PAC today based on to today's current rules.

Ms. Brown stated she felt the PAC is not following their own rules and the rules should not have been changed and could only be changed by legal counsel. Chair Gutierrez addressed Ms. Brown and thanked her for her comments and notified her the rules were interpreted with legal counsel involved.

Ms. Javurek asked if we could send a denial letter today so Ms. Brown could appeal the decision. Chair Gutierrez stated yes. The PAC members held a discussion on Ms. Brown and Mr. Robinson restated that Ms. Brown was denied back in 2022 for her disabled child benefit but the denial letter was never sent so we would need a motion to send the denial letter for her to appeal.

Mr. Mathis made a motion to deny Ms. Brown's request for disabled child benefits and to send the denial letter. Ms. Sullivan second the motion. The Chair summoned for discussion and given none took a vote. The motion passed unanimously.

Ms. Brown inquired how she could get verbatim minutes from the next meeting. Mr. Sawyer stated she could get a court reporter, or she could use the Pension Office's minutes. Mr. Sawyer added it is the applicant's responsibility to provide the court reporter if she wished to do so, but to remember it is her responsibility not that of the Pension Office. Ms. Brown inquired if she could use a tape recorder. Mr. Sawyer stated yes. Ms. Brown asked if she was to bring a tape recorder if each member of the PAC that spoke could identify themselves as she would not know who was speaking. Mr. Sawyer stated yes, the PAC could do that.

## 6. ADMINISTRATIVE

Mr. Robinson covered the investment flash report and current market conditions. He also notified the PAC of the increase in retirement requests as well as the upcoming October FPPTA class.

## 7. INFORMATION

The next regular PAC meeting is scheduled for Wednesday, September 13, 2023, at 2PM.

## 8. PRIVILEGE OF THE FLOOR

There was none.

## 9. ADJOURNMENT

The Chair adjourned the meeting at about 2:31 PM.

# GENERAL EMPLOYEES PENSION ADVISORY COMMITTEE FOR THE BOARD OF PENSION TRUSTEES 

August 2023

## CONSENT AGENDA FOR RECOMMENDED BENEFITS

## ALL CALCULATIONS AND DOLLAR AMOUNTS HAVE BEEN AUDITED IN

 ACCORDANCE WITH ACCEPTED PROCEDURES.
## 1. TIME SERVICE RETIREMENTS

Stanley Bethea, (Elections), effective July 1, 2023, in the monthly base amount of $\$ 8,311.64$ at the rate of $80 \%, 6$ months BACKDROP \$50,454.31

Nghi Lee, (ITD), effective July 29, 2023, in the monthly base amount of $\$ 3,760.82$ at the rate of $80 \%$ (32 years), 38 months \$151,959.06

Richard Mott, (Library), effective July 29, 2023, in the monthly base amount of \$3,087.87 at the rate of 50\% (20 years)

Shannon Noland, (JEA), effective July 15, 2023, in the monthly base amount of $\$ 3,239.66$ at the rate of $53.75 \%$ (21 years, 6 months)

## Capital Markets Review

## Second Quarter Economic Environment

During Q2, investors focused on the uncertainty of the future interest rate path and timing of further actions by the US Federal Reserve and other global central banks. At the start of 2023, the combination of rate hikes and quantitative tightening kept expectations for a near-term US recession embedded in many market forecasts. However, the continued strength of certain indicators, such as consumer spending and job growth, has altered the expected timing of a recession for some market participants. Mid-quarter forecasts and market outlooks were further complicated by the US debt ceiling debate, raising concerns regarding a potential default on the national debt. Ultimately, a deal was struck that suspended the ceiling until 2025. In the June data release, the Consumer Price Index (CPI) slowed to a $3.0 \%$ year-overyear rate, its lowest since March 2021. Recent job growth reports in the US provided mixed signals. US equity markets delivered strong results in Q2, primarily driven by the largest growth-oriented companies. US fixed income markets broadly posted negative returns in Q2, as the yield curve inverted further. The economic outlook in China, and its impact on global growth, continued to be a significant topic for investors. As concerns about China have grown, more investors are starting to view India and other south-east Asia countries as the drivers of growth in the region. The World Bank released its 2023 Global Economic Prospects report in June, forecasting subdued global GDP growth of $2.1 \%$ in 2023 and $2.4 \%$ in 2024, caused by tightening financial conditions and decreases in demand due to continued elevated inflation.

| Broad Market | Second Quarter Review |
| :--- | :--- |
| US equity markets continued their recovery in Q2 primarily driven by a handful of |  |
| mega-cap growth stocks. While all sectors, excluding energy and utilities, in the |  |
| Russell 1000 Index were positive, roughly half of its returns came from the |  |
| information technology sector driven by optimism around advancements in artificial |  |
| intelligence (AI) and related technology. Further, roughly two-thirds of the Russell |  |
| 1000 Q2 returns can be attributed to the 10 largest companies in the index. |  |
| Market Cap |  |
| Active large-cap managers continued to struggle to generate excess returns as index |  |
| concentration rises. Mid-cap managers generally performed well in Q2 while a |  |
| majority of active small-cap managers failed to outpace their respective benchmarks. |  |
| Style and Sector |  |
| Growth outperformed value by a significant margin across market caps for the |  |
| second consecutive quarter. The return spread of the Russell 1000 and Russell 2000 |  |
| Growth and Value Indexes were 8.7\% and 3.9\%, respectively. Additionally, the MSCI |  |
| USA Cyclical Index continued to outperform the MSCI USA Defensive Index by |  |
| 27.6\% year-to-date, indicating improving economic sentiment from investors despite |  |
| continued near-term uncertainty around inflation and interest rates. |  |

## Second Quarter Review

## Developed Markets

Following two consecutive quarters of outperformance, developed equity underperformed the US in Q2, with the MSCI EAFE returning 3.0\%. Value stocks outperformed growth stocks, while developed large-cap stocks outperformed small-cap stocks. While most active large-cap managers outperformed the MSCI EAFE Index, small-cap managers broadly underperformed the MSCI EAFE Small Cap Index.

## Emerging Markets

Emerging markets lagged developed markets in Q2, with the MSCI Emerging Market Index returning $0.9 \%$ as value outperformed growth and small-cap stocks outperformed large-cap stocks. The majority of active emerging market managers outperformed in Q2.

## Market Cap \& Style

While inflation in the US began to show signs of abatement, inflation continued to climb in Europe. Persistent above-target headline inflation combined with a tight labor market led the ECB to raise interest rates to $3.5 \%$, its highest level in over 20 years.

MSCI Style and Capitalization Market Performance (\%)

MSCI Region Performance (\%)

Valuation data courtesy of Bloomberg Professional Service.
P/E metrics shown represent the 5th through 95th percentiles to minimize the effect of outliers. All returns are shown net of foreign taxes on dividends.

## Broad Market

In Q2, the Fed maintained its interest rate range, breaking the streak of consecutive rate hikes. However, Fed Chair Powell noted that future rate hikes could still occur based on economic conditions. Treasury yields rose across maturities, with the 10 -year yield reaching $3.85 \%$. The yield curve inversion between the 2 -year and 10-year yields deepened in Q2, nearing the peak observed in March prior to the bank failures. Against this backdrop, the Bloomberg US Aggregate Bond Index posted a return of $-0.84 \%$.

## Credit Market

One trend observed in Q1 persisted, with lower-rated bonds delivering better performance. The Bloomberg US Corporate Investment Grade Index returned - $0.29 \%$ in Q2, lagging the Bloomberg US Corporate High Yield Index return of 1.75\%

## Emerging Market Debt

Emerging markets debt provided positive returns in Q2, with the JPMorgan EMBI Global Diversified Index returning 2.19\%. Yields on emerging market sovereign and corporate bonds decreased, while high-yield issuers outperformed investment-grade issuers due to a risk-on environment. Local emerging markets outperformed hard currency, with the JPMorgan GBIEM Global Diversified Index returning 2.51\%.

Valuation data courtesy of Bloomberg Professional Service.
Valuations shown represent the 5th through 95th percentiles to minimize the effect of outliers.

Second Quarter Review - Absolute Return

## General Market - Hedge Funds

In Q2, hedge funds delivered a second straight quarter of positive results. The HFRI Fund-Weighted Composite Index reported a net return of $2.2 \%$, highlighted by mixed results from commodity and macro-oriented managers amidst the Fed's slowing interest rate trajectory and cooling inflation data. While the dispersion of return among strategies has been wide in Q2, market-neutral strategies focusing on relative value, dispersion, and volatility trading have been able to benefit from turbulence caused by the regional banking crisis fallout. However, most have struggled to generate short alpha in technology-oriented indsutries that have been broadly rallying in recent months.

General Market - Global Tactical Asset Allocation (GTAA) Global Tactical Asset Allocation (GTAA) strategies that RVK follows closely generally posted positive returns during Q2 with moderate dispersion. However, a US-centric blend of $60 \%$ equity and $40 \%$ fixed income outperformed most diversified active managers due to larger allocations to mega-cap equity holdings.

## Second Quarter Review - Real Assets

## General Market - Diversified Inflation Strategies (DIS)

Diversified Inflation Strategy (DIS) managers tracked closely by RVK broadly underperformed a US-centric blend of $60 \%$ equity and $40 \%$ fixed income during the quarter. Managers with larger exposures to commodities and TIPS lagged peers most significantly while those with larger REIT and Global Listed Infrastructure allocations tended to outperfrom peers.

General Market - Real Estate
Core private real estate generated a $-2.7 \%$ in Q2 (on a preliminary and gross-of-fee basis), as reported by the NFI-ODCE Index, with the total return comprising $0.9 \%$ from income and $-3.6 \%$ from price appreciation. Income returns continue to trend at the lower end of historical levels while price appreciation continues to remain negative. Investors of publicly traded real estate significantly outperformed their private market counterparts by a meaningful margin, with publicly traded real estate delivering a Q2 total return of $1.6 \%$, as measured by FTSE NAREIT All REIT Index. In Q2, private real estate markets continued to experience similar trends as the prior three quarters. Significant headwinds persisted as a direct result of disruptions in the capital markets from 2022.

Asset Allocation by Theme is based on dedicated manager allocations; as such, thematic allocations are approximations. The RVK Liquidity Rating is calculated using beginning of month investment weights applied to each corresponding asset class liquidity rating. Please see the Glossary for additional information regarding liquidity, thematic, and custom index descriptions.

Performance shown is net of fees. Calculation is based on monthly periodicity. See Glossary for additional information regarding the Total Fund Attribution - IDP calculation.

## Investment Strategy

The Fund's strategy is on primarily stabilized income-producing investments in niche sectors; Education, Health, and Storage. Within these sectors the fund invests in student housing, seniors housing, medical office buildings, life science buildings, and self-storage. The majority of the return from the Fund is expected to be realized from current income, with a modest portion of the return to be derived from asset appreciation. Harrison Street believes that the primary property types it targets will provide better risk/return profiles than properties in traditional core portfolios across all economic cycles.

## Investment Strategy

The Fund pursues a diversified core-plus real estate strategy that seeks to generate a total return before fees of $9.0 \%$ to $12.0 \%$ annually by structuring investments to enhance risk-adjusted returns. Investments may be made through direct property ownership or indirectly through such vehicles as joint ventures, general or limited partnerships, limited liability companies, mortgage loans and other loan types, including mezzanine debt, and debt secured by an interest in the borrowing entity or interests in companies or entities that directly or indirectly hold real estate or real estate interests. It operates with a leverage limit of $40 \%$ and may invest up to $35 \%$ of its gross assets in higher-risk, non-core real estate investment opportunities.

## Investment Strategy

The Principal U.S. Property Account is a core real estate account designed to have a low to moderate risk profile consistent with other open-end real estate funds comprising the NFI-ODCE. This risk profile has two components: 1) a low to moderate real estate property risk profile; and 2) a low to moderate risk portfolio level operating profile. Low to moderate real estate property risk is accomplished by investing primarily in well-leased properties on an unleveraged basis. Low to moderate portfolio level risk is accomplished by operating with limited portfolio level obligations and a welldiversified portfolio. The Account invests in the traditional real estate property types; multifamily, office, industrial, and retail.

## Investment Strategy

The Fund pursues a diversified core real estate strategy that seeks to produce attractive risk-adjusted returns by focusing on selective acquisitions, diversification, active portfolio management, and asset management. The Fund invests in well-leased, stabilized assets in major US metropolitan markets and receives the majority of its return from the income component. Diversification for the Fund is consistently pursued on many levels, including geographic region, property type, and economic sector. The Fund has historically maintained a leverage ratio significantly lower than the NCREIF ODCE Index and invests $5-15 \%$ of its gross assets in value-added type real estate investment opportunities.

## City of Jacksonville Employees' Retirement System

## Addendum

## Performance Related Comments:

- Performance is annualized for periods greater than one year.
- The inception date shown indicates the first full month of performance following initial funding.
- The market value shown for the Transition Account includes residual assets from terminated managers.
- RVK began monitoring the assets of the City of Jacksonville Retirement System on 01/01/2019. Prior historical data was provided by the custodian and previous consultant.

## Custom Composite Benchmark Comments:

- Current Total Fund Policy Index: The passive Total Fund Policy Index is calculated monthly and currently consists of 30\% Russell 3000 Index, 23\% MSCI ACW Ex US Index (USD) (Net), 20\% Fixed Income Index, 15\% Real Estate Index, and 12\% Diversifying Assets Index.
- US Equity Index: The passive US Equity Index consists of 100\% DJ US TSM Index through 06/2009 and 100\% Russell 3000 Index thereafter.
- International Equity Index: The passive International Equity Index consists of $100 \% \mathrm{MSCI}$ EAFE Index (USD) (Gross) through 01/2011 and 100\% MSCI ACW Ex US Index (USD) (Net) thereafter.
- Fixed Income Index: The passive Fixed Income Index consists of $100 \%$ Bloomberg US Agg Bond Index through 10/2017 and 100\% Bloomberg US Universal Bond Index thereafter.
- Real Estate Index: The active Real Estate Index is calculated monthly using beginning of month investment weights applied to each corresponding primary benchmark return.
- Diversifying Assets Index: The Diversifying Assets Index is calculated monthly and consists of 50\% S\&P MLP Index (TR)/50\% NCREIF Timberland Index through 10/2017, 67\% S\&P MLP Index (TR)/33\% NCREIF Timberland Index through 09/2020, and calculated monthly using beginning of month investment weights applied to each corresponding primary benchmark return thereafter.

## Custom Manager Benchmark Comments:

- Baillie Gifford Index: The passive Baillie Gifford Index consists of 100\% MSCI EAFE Grth Index (USD) (Net) through 10/2017 and 100\% MSCI ACW Ex US Grth Index (USD) (Net) thereafter.
- Baillie Gifford Spliced Index: The passive Baillie Gifford Spliced Index consists of $100 \% \mathrm{MSCI}$ EAFE Index (USD) (Net) through 11/2019 and 100\% MSCI ACW Ex US Index (USD) (Net) thereafter.
- Custom REITs Index: The passive Custom REITs Index consists of 100\% MSCI US REIT Index (USD) (Gross) through 01/2019 and 100\% Vanguard Spl Real Estate Index thereafter.
- Vanguard Spliced Real Estate Index: The Vanguard Spl Real Estate Index consists of MSCI US REIT Index (USD) (Gross) adjusted to include a $2 \%$ cash position (Lipper Money Market Average) through 04/30/2009, MSCI US REIT Index (USD) (Gross) through 01/31/2018, MSCI US IM Real Estate 25/50 Transition Index through 07/24/2018, and MSCI US IM Real Estate 25/50 Index (Gross) thereafter.

## Glossary

Active Return - The difference between the investment manager/composite performance relative to the performance of an appropriate market benchmark.

Active Share - Measures the degree to which the holdings of a fund differ from the holdings of the benchmark. Active share is calculated by taking the sum of the absolute value of the differences of the weight of each holding in the fund versus the weight of each holding in the benchmark and dividing by two.

Alpha - A measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk as measured by beta. It is a measure of the portfolio's historical performance not explained by movements of the market or a portfolio's non-systematic return.

Alpha Ratio - A measure of a portfolio's non-systematic return per unit of downside risk. It is measured by dividing the alpha of a portfolio by the downside risk. The non-systematic return is a measure of a portfolio's historical performance not explained by movements of the market.

Average Quality - Bond quality ratings are reported using the investment managers' and the index providers' preferred rating agency. Average Quality for managers unable to provide this statistic is instead provided by Morningstar; if unavailable on Morningstar, it has been estimated using a credit quality distribution provided by the manager. There are two primary rating agencies in the US. Moody's assigns ratings on a system that employs up to four symbols (consisting of letters and numbers), such as, Aaa, Aa2, etc., with Aaa being the highest or safest rating. Standard \& Poor's (S\&P) employs a system that uses + and - along with letters, such as AAA, AA+, etc. The two rating agencies' systems are summarized below:

| S\&P | Moody's | Explanation | S\&P | Moody's | Explanation |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Higher Credit Quality - Investment Grade |  |  | Lower Credit Quality - Below Investment Grade |  |  |
| AAA | Aaa | Prime/Highest credit quality | BB+ | Ba1 | Speculative/Low credit quality |
| AA+ | Aa1 | High credit quality | BB | Ba2 |  |
| AA | Aa2 |  | BB- | Ba3 |  |
| AA- | Aa3 |  | B+ | B1 | Highly speculative |
| A+ | A1 | Upper-medium credit quality | B | B2 |  |
| A | A2 |  | B- | B3 |  |
| A- | A3 |  | CCC+ | Caa1 | Substantial credit/default risk |
| BBB+ | Baa1 | Lower-medium credit quality | CCC | Caa2 | Extremely speculative |
| BBB | Baa2 |  | CCC- | Caa3 |  |
| BBB- | Baa3 |  | CC | Ca | Vulnerable to default |
|  |  |  | C | Ca |  |
|  |  |  | D | C | In default |

Benchmark Effect - The difference between the blended return of each respective managers' benchmark within a composite and the composite's benchmark return.

Beta - A measure of the sensitivity of a portfolio to the movements in the market. It is a measure of a portfolio's non-diversifiable or systematic risk.
Box Plots - A graphical representation of the distribution of observations. From top to bottom, the four boxes represent the spread between the maximum value and the minimum value in each quartile. A quartile represents the values that divide the observations into four quarters (i.e., $1^{\text {st }}$ quartile, $2^{\text {nd }}$ quartile, $3^{\text {rd }}$ quartile, and $4^{\text {th }}$ quartile). The median observation is where the $2^{\text {nd }}$ quartile and $3^{\text {rd }}$ quartile meet.

Buy and Hold Attribution - At the beginning of the time period under analysis, the manager and benchmark portfolios are broken down into segments (i.e., styles, sectors, countries, and regions) based on the desired type of attribution. The formula assumes zero turn-over to the manager and benchmark portfolios throughout the period and calculates the segment returns ("buy and hold returns") to arrive at performance attribution. Due to portfolio turnover, buy and hold attribution may not accurately represent quarterly performance relative to the benchmark. Country, region, sector, and style allocations are as of the date one quarter prior to the reporting date, and the returns shown are for those segments throughout the quarter reported. Due to disclosure guidelines set by each investment manager, equity characteristics shown are as of the most recent date available. The following is the methodology for segment classification:

Sector - Attribution is calculated using the Global Industry Classification Standard (GICS), which is a detailed and comprehensive structure for sector and industry analysis. Stocks are classified by their primary sector as defined by S\&P Capital IQ data. Attribution to "other" is the result of securities based in industries that do not fit into any GICS classification.
Country/Region - Attribution is calculated using the Morgan Stanley Capital International (MSCI) region standards. Stocks are classified by their domicile country/region, as defined by S\&P Capital IQ data, and thus may differ from the classification of the investment manager and/or index provider. Attribution to "EMEA" represents securities based in Europe, the Middle East, and Africa. Attribution to "Other" is the result of securities based in countries/regions that do not fit into any MSCI classification.
Style - Stocks are classified into the following style boxes: large/mid/small vs. growth/neutral/value. Stocks are classified along large/mid/small categories at the time of the Russell index rebalancing, using the index market cap boundaries as cutoff points. Stocks are classified along growth/neutral/value categories at the time of the Russell index rebalancing, using the price/book ratio as supplied by S\&P Capital IQ. Stocks in the Russell 3000 Index portfolio are sorted by price/book ratio; names with the highest price/book ratio that make up $1 / 3$ of the total market capitalization are assigned to the growth category, and names that make up the subsequent $1 / 3$ of the total market capitalization are assigned to the neutral category, while the balance of the names are assigned to the value category. Stocks are unclassified when there is not enough data to determine a size and style metric.

Portfolio Characteristics and Buy and Hold Attribution reports utilize product-specific data for all mutual funds and commingled funds.

## Glossary

## Capital Markets Review -

Breakeven Inflation - Measures the expected inflation rate at each stated maturity by taking the difference between the real yield of the inflationlinked maturity curve and the yield of the closest nominal Treasury maturity.
Consumer Confidence - Measures domestic consumer confidence as defined by the degree of optimism on the state of the economy that consumers express through saving and spending.
Consumer Price Index (CPI) - Measures the change in the price level of consumer goods and services.
Federal Funds Rate - The interest rate at which a depository institution lends funds maintained at the Federal Reserve to another depository institution overnight. It is one of the most influential interest rates in the US economy, since it affects monetary and financial conditions, which in turn have a bearing on key aspects of the broad economy including employment, growth and inflation.
Option-Adjusted Spread - Measures the flat spread of an index or bond to the Treasury yield curve after removing the effect of any embedded options.
Purchasing Managers Index (PMI) - Measures economic activity by surveying purchasing managers on a monthly basis as to whether business conditions have improved, worsened, or stayed the same.
Real Gross Domestic Product (Real GDP) - An inflation-adjusted measure that reflects the value of all goods and services produced by an economy in a given year.
Unemployment Rate - The percentage of the total labor force that is unemployed but actively seeking employment.
US Dollar Total Weighted Index - Measures the value of the US Dollar relative to a basket of other world currencies. It is calculated as the weighted geometric mean of the dollar's value versus the EUR, GBP, CAD, SEK, CHF, and JPY.
VIX - Measures the implied volatility of S\&P 500 Index options by looking at the market's expectation of the S\&P 500 Index volatility over the next 30 day period. Commonly referred to as the "fear index" or the "fear gauge."

Cash Flow Effect - The composite's active return minus the sum of each managers' active return minus the benchmark effect.
Consistency - The percentage of quarters that a product achieved a rate of return higher than that of its benchmark. The higher the consistency figure, the more value a manager has contributed to the product's performance.

Convexity - A measure of the shape of the curve that describes the relationship between bond prices and bond yields.
Correlation - A statistical measure of the relationship between asset class returns. A value of 1.00 is a perfect correlation; that is, the asset classes always move in the same direction. A value of -1.00 indicates a perfect negative correlation, in which the asset classes always move in opposite directions of each other. A value of 0 indicates there is no relationship between the direction of returns of the two asset classes. Correlation calculations only consider the direction of changes relative to two variables and not the magnitude of those changes.

Coupon Rate - The percentage rate of interest paid on a bond or fixed income security; it is typically paid twice per year.
Current Yield - The annual income of a security divided by the security's current price.
Down Market Capture - Down market by definition is negative benchmark return and down market capture represents the ratio in \% terms of the average portfolios return over the benchmark during the down market period. The lower the value of the down market capture the better the product's performance.

Downside Risk - A measure similar to standard deviation that focuses only on the negative movements of the return series. It is calculated by taking the standard deviation of the negative returns for the selected periodicity. The higher the factor, the riskier the product.

Earnings Per Share - It is backward looking, calculated using the one year current EPS divided by the one year EPS five years ago.
Effective Duration - The approximate percentage change in a bond's price for a 100 basis point change in yield.
Excess Return vs. Market - Average of the monthly arithmetic difference between the manager's return and the benchmark return over a specified time period, shown on an annualized basis.

Excess Return vs. Risk Free - Average of the monthly arithmetic difference between the manager's return and the risk-free return (i.e., ICE BofAML 3 Mo US T-Bill Index unless specified otherwise) over a specified time period, shown on an annualized basis.

Excess Risk - A measure of the standard deviation of a portfolio's performance relative to the risk-free return.
Expense Ratios - Morningstar is the source for mutual fund expense ratios.
Gain/Loss - The net increase or decrease in the market value of a portfolio excluding its Net Cash Flow for a given period.
Indices - All indices and related information are considered intellectual property and are licensed by each index provider. The indices may not be copied, used, or distributed without the index provider's prior written approval. Index providers make no warranties and bear no liability with respect to the indices, any related data, their quality, accuracy, suitability, and/or completeness.

Information Ratio - Measured by dividing the active rate of return by the tracking error. The higher the information ratio, the more value-added contribution by the manager.

## Glossary

Liability Driven Investing (LDI) - A method to optimally structure asset investments relative to liabilities. The change in liabilities is estimated by the Ryan Labs Generic PPA Index of appropriate duration for that Plan. This benchmark is based on generic data and is therefore an approximation. RVK is not an actuarial firm, and does not have actuarial expertise.

Estimated Funded Status - The estimated ratio of a Plan's assets relative to its future liabilities. This is calculated by dividing the Plan's asset market value by the estimated present value of its liabilities. The higher the estimated funded status, the better the Plan's ability to cover its projected benefit obligations. An estimated funded status of $100 \%$ indicates a Plan that is fully funded.
Estimated PV of Liabilities - An estimate of a Plan's future liabilities in present value terms. The beginning of the period liability is provided by the Plan's actuary. The period-end present value liability estimate provided in this report is derived by applying the estimated percentage change generated using the Ryan Labs Generic PPA Index with duration similar to that reported on the most recent actuarial valuation report. Duration of Liabilities - The sensitivity of the value of a Plan's liabilities to changes in interest rates, as calculated by the Plan's actuary. Duration of Assets - The dollar-weighted average duration of all the individual Plan assets.
Estimated Plan Hedge Ratio - The estimate of how well a Plan's investment portfolio is hedged against changes in interest rates - a primary driver of funded status movements. This is calculated by dividing the dollar-weighted values of both the Plan asset duration by the liability duration and multiplying by the estimated funded status. An estimated plan hedge ratio of zero indicates that the Plan's liabilities have not been hedged, whereas a value of one indicates fully hedged.

Modified Duration - The approximate percentage change in a bond's price for a 100 basis point change in yield, assuming the bonds' expected cash flows do not change.

Mutual Fund Performance - Whenever possible, manager performance is extended for any share class that does not have 10 years of history. Using Morningstar's methodology, a single ticker within the same fund family (often the oldest share class) is chosen to append historical performance.

Net Cash Flow - The sum, in dollars, of a portfolio's contributions and withdrawals. This includes all management fees and expenses only when performance shown is gross of fees.

## Peer Groups

Plan Sponsor Peer Groups - RVK utilizes the Mellon Analytical Solutions Trust Universe along with the Investment Metrics Plan Sponsor Universe. The combined Mellon Analytical Solutions Trust Universe and Investment Metrics Plan Sponsor Universe is used for comparison of total fund composite results and utilizes actual client performance compiled from consultant and custodian data. The Plan Sponsor Peer Group database includes performance and other quantitative data for over 2,100 plans which include corporate, endowment, foundation, public, and Taft Hartley plans. Investment Manager Peer Groups - RVK utilizes Investment Metrics' Peer Groups for investment manager peer comparison and ranking. The Investment Metrics Peer Group database includes performance and other quantitative data for over 840 investment management firms and 29,000 investments products, across more than 160 standard peer groups. Mutual Fund Peer Groups are net of fees.

Percentile Rankings - Percentile rank compares an individual fund's performance with those of other funds within a defined peer group of managers possessing a similar investment style. Percentile rank identifies the percentage of a fund's peer group that has a higher return (or other comparative measurement) than the fund being ranked. Conversely, 100 minus the individual fund's ranking will identify the percentage of funds within the peer group that have a lower return than the fund being ranked.

1 - Highest Statistical Value 100 - Lowest Statistical Value
Example: American Funds AMCP;R-4 (RAFEX) is ranked in the $4^{\text {th }}$ percentile within the IM US Equity Large-Cap Growth Funds (MF) Peer Group for the Sharpe Ratio. Within the IM US Equity Large-Cap Growth Funds peer group, 4\% of the other funds performed better than American Funds AMCP;R-4 (RAFEX), while $96 \%$ of the funds performed worse.

Performance Methodology - RVK calculates performance for investment managers and composites using different methodologies.
Investment Managers - Performance is calculated for interim periods between all large external cash flows for a given month and geometrically linked to calculate period returns. An external cash flow is defined as cash, securities, or assets that enter or exit a portfolio. RVK defines a "large cash flow" as a net aggregate cash flow of $\geq 10 \%$ of the beginning-period portfolio market value or any cash flow that causes RVK calculated performance to deviate from manager/custodian reported performance in excess of 5 basis points for a given month.
Composites - The Modified Dietz methodology is utilized to calculate asset class, sub-asset class, and total fund composite performance. The Modified Dietz method calculates a time-weighted total rate of return that considers the timing of external cash flows; however, it does not utilize interim period performance to mitigate the impact of significant cash in- and outflows to the composite.

RVK calculates performance beginning with the first full month following inception. Since inception performance may vary from manager reported performance due to RVK using the first full month of returns as the inception date. Performance for both managers and composites is annualized for periods greater than one year

Portfolio Characteristics - Due to disclosure guidelines set by each investment manager, portfolio characteristics shown are as of the most recent date available

Price to Earnings Ratio - The ratio valuing a company's current share price relative to its trailing 12-month per-share earnings (EPS).
Private Equity Quartile Ranks - Private Equity quartile ranks are generated using vintage year peer group data provided by Thomson Reuters, and are based on each fund's annualized, since inception internal rate of return (IRR). Three Private Equity peer groups are available via Thomson Reuters: Buyout, Venture, and All Private Equity. Ranks are available quarterly, at a one-quarter lag.

R-Squared - The percentage of a portfolio's performance explained by the behavior of the appropriate benchmark. High R-Squared means a higher correlation of the portfolio's performance to the appropriate benchmark.

Return - Compounded rate of return for the period.
\% Return - The time-weighted rate of return of a portfolio for a given period.
Risk Free Benchmark - ICE BofAML 3 Mo US T-Bill Index unless specified otherwise.

## Glossary

RVK Liquidity Rating - A qualitative method for determining the relative amount of liquidity in a portfolio. The characteristics considered when determining relative liquidity include trading volume, gates for redemption, leverage, nature of transactions, and pricing mechanisms. The RVK Liquidity Rating is calculated using beginning of month investment weights applied to each corresponding asset class liquidity rating.

| Asset Class | RVK Liquidity Rating | Asset Class | RVK Liquidity Rating |
| :---: | :---: | :---: | :---: |
| Liquid Investments |  | Less Liquid Investments |  |
| T-Bills and Treasurys | 100 | Fixed Income Plus Sector | 50 |
| Cash Equivalents | 98 | Stable Value (Plan Sponsor Directed) | 50 |
| TIPS | 95 | Hedge Funds of Funds | 35 |
| US Large Cap Equity | 95 |  |  |
| Diversified Real Return | 93 |  |  |
| Stable Value (Participant Directed) | 91 |  |  |
| Global Equity | 90 | Not Liquid Investments |  |
| Non-US Large Cap Equity | 90 | Core Real Estate | 25 |
| Global Tactical Asset Allocation | 88 | Core Plus Real Estate | 15 |
| MLPs | 85 | Non-Core Real Estate | 5 |
| US Mid Cap Equity | 85 | Private Equity | 5 |
| US SMid Cap Equity | 85 | Private Credit | 5 |
| US Small Cap Equity | 85 |  |  |
| REITs | 85 |  |  |
| Non-US Small Cap Equity | 85 |  |  |
| Emerging Markets Equity | 85 |  |  |
| Core Fixed Income | 85 |  |  |
| Core Plus Fixed Income | 80 |  |  |

Sector Allocation - Negative fixed income sector allocation reflects manager's use of derivatives, short selling, or interest rate swaps.
Sharpe Ratio - Represents the excess rate of return over the risk-free return (i.e., ICE BofAML 3 Mo US T-Bill Index unless specified otherwise), divided by the standard deviation of the excess return to the risk free asset. The result is the absolute rate of return per unit of risk. The higher the value, the better the product's historical risk-adjusted performance.

Simple Alpha - The difference between the manager's return and the benchmark's return.
Spread Duration - The approximate percentage change in a bond's price for a 100 basis point change in its spread over a Treasury of the same maturity.

Standard Deviation - A statistical measure of the range of a portfolio's performance. The variability of a return around its average return over a specified time period.

Thematic Classification - Represents dedicated manager allocations; as such, thematic allocations are approximations. RVK categorizes the following asset classes as Alpha, Capital Appreciation, Capital Preservation, and Inflation:

| Alpha | Capital Appreciation |
| :--- | :--- |
| Absolute Return Strategies | Public Equity |
| Currency Overlay | Private Equity |
|  | Preferred Securities |
|  | High Yield |
|  | Convertible Fixed Income |
|  | TALF Funds |
|  | Distressed Debt |
|  | Emerging Market Fixed Income |
|  | Value Added Real Estate |
|  | Opportunistic Real Estate |

Capital Preservation
Core Fixed Income
CMBS Fixed Income
Asset Backed Fixed Income
Domestic Core Plus Fixed Income
Mortgage Backed Fixed Income
International Developed Fixed Income
Cash Equivalents
Stable Value

## Inflation

TIPS
Bank Loans
Core Real Estate
Real Return
Inflation Hedges
REITs
Commodities

Time Period Abbreviations - QTD - Quarter-to-Date. CYTD - Calendar Year-to-Date. FYTD - Fiscal Year-to-Date. YOY - Year Over Year.
Total Fund Attribution - The Investment Decision Process (IDP) model provides an approach to evaluating investment performance that applies to all asset classes and investment styles. The IDP model is based on a top-down hierarchy framework of investment decisions, with each decision contributing to the overall profit or loss. The IDP approach starts from the strategic asset allocation and follows the flow of the investments down to the manager's skill.

Strategic Asset Allocation (SAA) - The percentage return gained or lost from the long-term strategic asset allocation decision, the most significant determinant of long-term performance. SAA is the product of the target asset allocation multiplied by the corresponding benchmark returns.
Tactical Asset Allocation (TAA) - The percentage return gained or lost from not having been precisely allocated at the target asset allocation mix, whether by deviations that are tactical in nature or a by-product of moving towards the target mix. TAA is the product of the actual asset allocation multiplied by the broad asset class benchmarks, less the SAA.
Style Selection (SS) - The percentage return gained or lost from intentional style biases within each asset class (e.g. value rather than core or overweight to emerging markets relative to benchmark). SS is the product of the actual manager allocation within each asset class multiplied by their specific benchmark, less TAA.
Manager's Skill (MS) - The percentage return gained or lost from manager value added relative to their specific benchmark. MS is the product of the actual manager allocation multiplied by their achieved excess return.

Total Fund Beta - Total Fund Beta is calculated using the S\&P 500 as the benchmark. It represents a measure of the sensitivity of the total fund to movements in the S\&P 500 and is a measure of the Total Fund's non-diversifiable or systematic risk.

## Glossary

Tracking Error - A measure of the standard deviation of a portfolio's performance relative to the performance of an appropriate market benchmark.
Treynor Ratio - Similar to Sharpe ratio, but focuses on beta rather than excess risk (standard deviation). Treynor ratio represents the excess rate of return over the risk-free rate (i.e., ICE BofAML 3 Mo US T-Bill Index unless specified otherwise) divided by the beta. The result is the absolute rate of return per unit of risk. The higher the value, the better historical risk-adjusted performance.

Unit Value - The dollar value of a portfolio, assuming an initial nominal investment of $\$ 100$, growing at the compounded rate of $\%$ Return for a given period.

Up Market Capture - Up market by definition is positive benchmark return and up market capture represents the ratio in \% terms of the average portfolio's return over the benchmark during the up market period. The higher the value of the up market capture the better the product's performance.

Yield to Maturity - The rate of return achieved on a bond or other fixed income security assuming the security is bought and held to maturity and that the coupon interest paid over the life of the bond will be reinvested at the same rate of return. The 30-Day SEC Yield is similar to the Yield to Maturity and is reported for mutual funds.

Yield to Worst - The bond yield calculated by using the worst possible yield taking into consideration all call, put, and optional sink dates.

## General Market Commentary

- Global equity markets experienced positive results in July, with most US and international indices posting low to mid-single digit returns for the month. Stocks traded higher due to the release of positive economic data as well as declining concerns over US inflation.
- Inflation continued to moderate, as the consumer price index (CPI) increased just $3.00 \%$ from the previous year as of the end of June, the lowest reading since March 2021. However, the Fed increased interest rates by 25 basis points at their July meeting after a temporary pause in June which had followed ten consecutive interest rate hikes.
U.S. GDP increased at an annual rate of $2.40 \%$ in the second quarter of 2023 according to advance estimates, indicating the U.S. economy is growing faster than expected. Additionally, U.S. Consumer Confidence reached its highest level in two years while the U.S. labor market continued to show resilience, easing recession concerns for investors.
Equity markets posted positive returns in July as the S\&P 500 (Cap Wtd) Index returned $3.21 \%$ and the MSCI EAFE (Net) Index returned $3.24 \%$. Emerging markets returned $6.23 \%$, as measured by the MSCI EM (Net) Index.
The Bloomberg US Aggregate Bond Index returned $-0.07 \%$ in July, underperforming the $0.10 \%$ return by the Bloomberg US Treasury Intermediate Term Index. International fixed income markets returned $0.83 \%$, as measured by the FTSE Non-US World Gov't Bond Index.

Public real estate returned $2.85 \%$ in July and $4.98 \%$ over the trailing five-year period, as measured by the FTSE NAREIT Eq REITs Index (TR).
The Cambridge US Private Equity Index returned $-0.36 \%$ for the trailing one-year period and $16.18 \%$ for the trailing five-year period ending March 2023.
Absolute return strategies returned $1.04 \%$ for the month and $3.99 \%$ over the trailing one-year period, as measured by the HFRI FOF Comp Index.

- Crude oil's price increased by $15.80 \%$ during the month but has decreased by $17.06 \%$ YoY.
