

## Page 2 – Capital Markets Review

- Equity markets began the month strong, before pulling back sharply the last week of January, finishing with mixed results. Broad international and US indices ended the month roughly flat, although domestic small cap indices outperformed their large cap counterparts and finished with mid-single digit returns. The strong performance early in the month was largely due to vaccine and stimulus optimism, but pulled back in part due to renewed uncertainty over likelihood of the large 1.9 trillion-dollar stimulus package being passed by Congress, and due to the continued spread of COVID-19 combined with delays in vaccine distribution.
- Adding to the downwards pricing pressure on equity markets towards the end of the month, groups of retail investors attempted to enact a short squeeze on select hedge funds with large short interest in certain small cap stocks. Some hedge funds were forced to sell large amounts of liquid equity positions in order to remain solvent.
- At the January Federal Reserve meeting, the FOMC announced it would continue its pace of purchasing assets while keeping the federal funds rate near zero to support the economy, noting that the US' economic outlook remains uncertain.
- Equity markets posted negative returns in January as the S&P (Standard & Poor's) 500 (Capitalization Weighted) Index returned -1.01% and the MSCI EAFE (Europe, Australasia and Far East) (Net) Index returned -1.07%. Emerging markets returned 3.07% as measured by the MSCI EM (Emerging Markets) (Net) Index.
- The Bloomberg US Aggregate Bond Index returned -0.72% in January, underperforming the -0.24% return by the Bloomberg US Treasury Intermediate Term Index. International fixed income markets returned 1.41%, as measured by the FTSE (Financial Times Stock Exchange) Non-US World Government Bond Index.
- Public real estate, as measured by the FTSE (Financial Times Stock Exchange) NAREIT (National Association of Real Estate Investment Trusts) Equity REITs (Real Estate Investment Trusts) Index (Total Return), returned 0.10% in January and 5.51% over the trailing five-year period.
- The Cambridge US Private Equity Index returned 13.35% for the trailing one-year period and 12.99% for the trailing five-year period ending September 2020.
- The return for absolute return strategies, as measured by the HFRI (Hedge Fund Research Indices) FOF (Fund of Funds) Composite Index, returned -1.03% for the month and 9.37% over the trailing one-year period.
- Crude oil's price increased by 7.58% during the month, and has increased by 1.24% year over year.
