Suite # 200

STARTED:

COMPLETED:

REQUIRED: 1/3/2014

Coral Gables, FL 33134

Phone: 305-447-3561 Fax: 305-447-3580

The existing utility wall chase which runs north to south needs to have access doors. At this time we identify an existing corridor louver which can be used. We will need one at the north end and south ends of the chase. The SAO vestibule would need two hinged door wood panels to access the existing chase. Please advise.

Date:

Requested By: The Morga	anti Group, Inc.
Signed:	
Kamal Cooper	

ANSWER:

Attached is the new access panel in an extended wall for the cleanout at the southern end. The opposite end (north/other side near Angela's Office) will be the same grille in an existing wall with same dimensions. The look of the access grille/panel should be similar in detail and color (powder coat RAL 7036) as the existing grilles at the historic corridor.

All other access panels at this double chase wall between the historic corridor and courtrooms were already discussed and accepted by all parties.

ELF15J THIN LINE STATIONARY LOUVER EXTRUDED ALUMINUM

STANDARD CONSTRUCTION

FRAME

1 1/2" (38) deep, 6063T5 extruded alufigw lankned (6.1) *880. difw munim thickness. Caulking surfaces provided.

6063T5 extruded aluminum with .063 (1.6) nominal wall thickness. Blades are positioned at 45° angle and spaced approximately 17/8" (48) center to center.

SCREEN

 $5/8^{\circ} \times .040^{\circ}$ (16 x 1) expanded, flattened aluminum bird screen in removable frame. Screen adds approximately 1/2" (13) to louver depth.

FINISH

Mill <

MINIMUM SIZE

6°w x 6°h (152 x 152)..

APPROXIMATE SHIPPING WEIGHT 2,5 jb, per sq. ft. (12,2 kg/m²).

MAXIMUM FACTORY ASSEMBLY SIZE

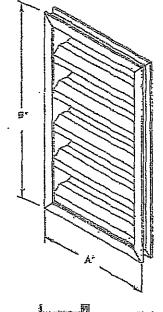

Shall be 60 sq. ft. (5.5m²) per section, not to exceed 120° v x 72°h (3048 x 1829) or 72 w x 120 h (1829 x 3048).

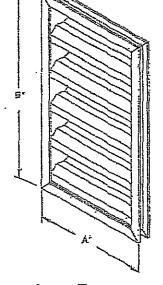

Louvers larger than the maximum factory assembly size will require field assembly of smaller sections.

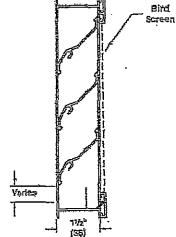

SUPPORTS

Louvers may be provided with rear mounted blade supports that increase overall louver depth depending on louver size, assembly configuration or windload.

Consult Ruskin for additional information.

FEATURES

The ELF15J piters:

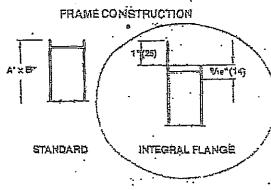

- * 50% Free Area.
- Published performance ratings based on lesting in accordance with AMCA Publication 511.
- · Aluminum construction for low maintenence and high resistance to corrosion.

VARIATIONS

Variations to the basic design of this louver are available at additional cost. They include:

- · Extended still
- Hinged frame. <
- Frontor rear security bars.
- * Filter racks. ·
- Installation angles.
- A variety of bird and insect screens.
- Selection of finishes: prime cost, baked enamel (modified fluoropolymer), epoxy, Pearledize, Kynar, clear and color anodize. (Some variation in anodize color consistency is possible.)

Consult Ruskin for other special requirements.

Dimensions in inches, parenthesis () indicate millimeters.

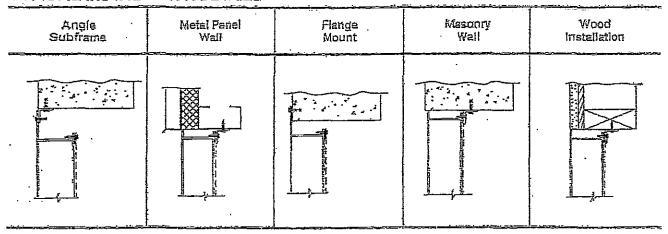

"Units iumished 1/4" (6) smaller than given opening dimensions.

TYPICAL INSTALLATION DETAILS

SUGGESTED SPECIFICATION

Furnish and install louvers as hereinatter specified where shown on plans or as described in schedules. Louvers shall be stationary type. Louvers shall have a minimum of 50% free area based on a 48" wide x 48" high (1219 x 1219) size. Stationary blades shall be contained within a 11/2" (38) frame. Louver components (heads, jambs, sills, blades & multions) shall be factory assembled by the touver manufacturer. Louver sizes too large for shipping shall be built up by the contractor from factory assembled louver sections to provide overall sizes required. Louver design shall incorporate structural supports required to withstand a wind load of 20 lbs. per sq. it. (95kPa) (equivalent of a 90 mph [145 KPH] wind - specifier may substitute any loading required).

Frame: 11/2" (38) deep .063" (1.6) wall thickness.

Louvers shall be Ruskin Model ELF15J extruded 6063T5 aluminum

Blades: .063* (1.6) nominal wall thickness. Blades are positioned at 45° angle and spaced at approximately 17/8*

(48) center to center.

Screen: 3/4 x .051* (19 x 1.3) expended, flattened eluminum in

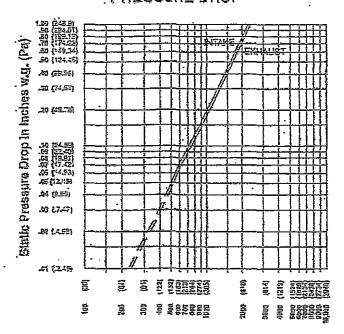

removable frame.

alloy construction as follows:

-Finish: Select imish specification from Ruskin Finishes. Brochure.

Published louver performance data derived from testing in accordance with AMCA 500 for Air Performance must be submitted for approval prior to fabrication and must demonstrate pressure drop equal to or less than the Ruskin model specified.

> REVISED July 23, 2014

The Morganti Group, Inc. 1450 Centre Park Blvd., Suite 260 West Palm Beach, FL 363401 Attn: Joe Capraro

This proposal is in reference to the stabilization and releveling on retaining wall on building located at 311 Monroe St., Jax., FL.

Hygema proposes to complete the following said work to correct settlement on approximately 20 ft. of retaining wall:

- · Supply engineering for work to be completed
- Have locates done in Hygema's work area to install helical piles
- Install (8) Magnum MH3258 Helical piles on approximately 20 LF of well
- Install (8) MP1002-3 Angle Brackets to footing area of wall
- Clean out cracks and joints to allow for realignment of wall
- Jack and relevel said wall back to original position as much as possible
- Grout joints in stone after releveling is completed
- Fill void under footing with flowable fill
- Clean up and leave a level work area

Contractor responsible for the following:

- Secure permit to complete work
- Supply water and electric on jobsite
- Give Hygema adequate work area to perform work

The work will be done in a professional and safelike manner and will comply with contractor's safety regulations. Certificates of Worker's Comp and General Liability Insurance available upon request.

The total price to complete said work will be \$12,800 payable upon completion.

NOTE: The reason for number of piles to be installed is due to inadequate footing size and to guarantee successful realignment of wall.

After exposing the footing and evaluating, if the number of piles to complete stabilization is . less than (8), there will be a deduction of \$600.00 per pile.

Albert "Jay" Boyles - HYGEMA HOUSE MOVERS, INC.

CONTRACT CONDITIONS

1. Contract Time:

It is understood that this work is to be performed in one continuous operation.

2. Hidden Conditions:

It is understood that in undertaking to correct/repair conditions present, other conditions that were hidden may become known (including but not limited to broken pipes, drains, etc.) Such consequences will be beyond Hygema House Movers, Inc. control and Hygema House Movers, Inc. assumes no responsibility for such consequences.

3. <u>Unpiered Areas:</u>

Unpiered areas not directly supported by piers are excluded under Warranty. Movement of an unpiered area which causes the movement of a piered area is excluded under Warranty.

4. <u>Landscaping</u>:

Plants, shrubs and grass that are removed and replaced are not guaranteed

LIMITED WARRANTY

The work performed under this agreement is guaranteed against all defects in materials for a period of 30 years and 30 years for labor for the above subject property owner or transferrable to subsequent purchasers of the above named property. If any vertical settlement occurs in the areas repaired within this time other than settlement or movement caused by earthquake, severe wind, flood, change in water table, or other Acts of God, or any similar man made condition, then Hygema House Movers, Inc. will at no cost or expense to you, correct any defect in workmanship or material that may have occurred.

Your exclusive remedy shall be for correction of any defect in workmanship and materials, as set forth above. In no event shall you be entitled to consequential damages, regardless of whether the claim is based on warranty, contract, tort or otherwise.

Respectfully,

*Bracket connection to pile consists of field threaded blind bolts as described in Section 7-13 of AISC Code. Capacities shown are based on IAS accredited laboratory testing of Magnum products.

Description

The Magnum MP1005-3 plate bracket has 50 fons maximum ultimate capacity, 25 fons working capacity in compression and 16 tons maximum capacity, 8 fons working capacity in tension. The bracket consists of a collar tube with (3) 3/4" threaded bolt holes for connection to Magnum helical piles and Magnum push piers and (6) thru holes for attachment to existing concrete using expansion anchors. The bracket is designed in accordance with ICC-ES document AC358 as well as IBC, ACI, and AISC codes. Design and detailing of the connection to the structure varies by project and is the responsibility of registered design professional including maximum concrete span, pier spacing, concrete shear, and concrete bearing.

All Magnum Products Made in U.S.A. U.S. Patents 6,058,662 and 5,234,287; Other Patents Pending.

Installation Notes:

Prepare the existing foundation. For steel push pier applications, attach the bracket and Magnum ram. Install the push pier to the required pressure and load test. For helical pile applications, excavate the pier location so the helix bearing plates fit below the existing foundation and the shaft is as close as possible to the face of the foundation. Install the helical pile to the correct depth and torque. Mount the bracket by sliding down the shaft rotating into position. In both cases, lift the structure as needed using either a Magnum ram or lifting fixture. Drill holes and bolt the bracket to the pile.

	28 Tons / 53 Tons	14 Tons / 26 Tons
TRIPLE SOLTED	<u> </u>	

*Bracket connection to pile consists of field threaded blind bolts as described in Section 7-13 of AISC Code. Capacities shown are based on IAS accredited laboratory testing of Magnum products.

Description

The Magnum MP1002-3 angle bracket has 53 tons maximum ultimate capacity, 26 tons working capacity in compression. The bracket consists of a collar tube with (3) 3/4" threaded bolt holes for connection to Magnum helical piles and Magnum push piers and (6) thru holes for attachment to existing concrete using expansion anchors. The bracket is designed in accordance with ICC-ES document AC358 as well as IBC, ACI, and AISC codes. Design and detailing of the connection to the structure varies by project and is the responsibility of registered design professional including maximum concrete span, pier spacing, concrete shear, and concrete bearing.

All Magnum Steel & Products Made in U.S.A. U.S. Patents 6,058,662 and 5,234,287; Other Patents Pending.

Installation Notes:

Prepare the existing foundation. For steel push pier applications, attach the bracket and Magnum ram. Install the push pier to the required pressure and load test. For helical pile applications, excavate the pier location so the helix bearing plates fit below the existing foundation and the shaft is as close as possible to the face of the foundation. Install the helical pile to the correct depth and torque. Mount the bracket by sliding down the shaft rotating into position. In both cases, lift the structure as needed using either a Magnum ram or lifting fixture. Drill holes and bolt the bracket to the pile.

MAGNUM® MH325B Helical Piles

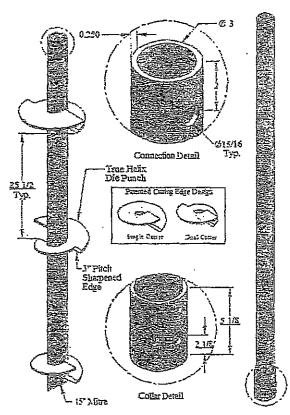

32 Ton Ultimate - 16 Ton Allowable Capacity

High-Strength 3.0" Diameter, 0.25" Wall, Round-Shaft with Rigid Coupler & (1) 7/8" Bolt

Description .

Magnum MH325B Helical Piles have 32 tons ultimate capacity and 16 tons working capacity in compression and tension. Lead sections and extensions couple together to extend helical bearing plates to the desired bearing stratum. Round shafts offer increased lateral and buckling resistance compared to solid square shafts. Capacity calculations are based on average life expectancy of over 75 years for most soil conditions. Patented Magnum Dual-Cutting Edge helical bearing plates (DCE) enhance penetration through dense soils with occasional cobbles and debris. Custom lengths and fielix configurations are available upon request. See Magnum Technical Reference Manual for additional information including design tools, prescriptive specifications and example plans.

Drawing above shows an example pile lead and extension section. Section lengths and number of helices vary with project requirements and soil conditions.

3.0" Product Line Helical Bearing Plate Specifications & Available Configurations

0.375" Thick; ASTM A36 or Higher
3.00" Helix Pitch
8", 10", 12", 14" Diameter
Standard Circular Helix, or
Patented Dual Cutting Edge Helix
Sharpened Edges - All Helix
"3 ft. Lead or Extension - up to 2 helical bearing plates
"6 ft. Lead or Extension - up to 3 helical bearing plates
"10 ft. Lead or Extension - up to 6 helical bearing plates
"15 ft. Lead or Extension - up to 8 helical bearing plates
"5 ft. Lead or Extension - up to 8 helical bearing plates
"5 ft. Lead or Extension - up to 8 helical bearing plates
"5 ft. Lead or Extension - up to 8 helical bearing plates

40 Tons	Ultimate Capacity				
. 20 Tons	Allowable Capacity				
SCHOOL OF GAPAGER ASSESSMENTED STREET					
32 Tons	Ultimate Compression & Tension				
16 Tons	Allowable Compression & Tension				

Note: Helical piles shall be installed to appropriate depth into suitable bearing stratum as determined by geotectratical engineer or local practice. Capacity by torque is based on advancing pile to maximum installation torque. A minimum factor of safety of 2.0 is recommended for determining allowable capacity from correlations with final installation torque. Deflections of 0.5" are typical at allowable capacity. A higher factor of safety may be required for smaller deflections. For tension capacity, helical bearing plates must be deeply embedded. Load tests are recommended when practical.

DESCRIPTION OF PROPOSAL

This change order proposal is a result of CPR007 SAO Network and Security dated 5/16/14, which gave instructions to provide credit for access badging station, video storage, PC work stations, Cisco switches and rack mounts etc. This change order proposal includes all credits and overhead and profit necessary to fulfill the above request. Please furnish a written approval by 8/12/14.

Re: Response to change request CPR007

As requested, we are submitting pricing to provide adds and deletes as requested by AECOM cover letter dated 5/16/14, and CPR007 TY-drawings dated 5/2/14. Pricing herein is in accordance with contract documents, Section 20.34.2.3.

Included:

- Installation, field adjustments, final test and checkout
- Warranty as per original contract

Excluded:

Any required electrical work; such as standard electrical back boxes, conduit, flex, etc.

Pricing:

Our price for the above-listed scope of work is Negative Four Thousand, Eight-hundred Fifty-four and 36/100 dollars (-\$4,854.36).

Sincerely,

Randy Graves

Re.:

SAO Network and Security

Project Name: Old Federal Courthouse Renovations

Project No.: 60175719

The following items pertains to the security package provided by Presidio.

- 1. Provide an additional cost to increase the total of "Cisco UC Phone 7841 (replaces the UC6941), charcoal, slimline Handset", Model number: CP-7841-CL-K9 to eighty (80).
- 2. Provide a credit to reduce the total of "Cisco UC Conference Station 7937 Gobal", Model number CP-7937G to twenty (20).
- 3. Provide a credit to reduce the total of "Cisco UC Phone 8961, Charcoal, standard handset", Model number CP-8961-C-K9 to three hundred and eighty (380).
- 4. Provide a credit to reduce the total of "Cisco Catalyst 3750X 48 Port Full PoE IP Base", Model number WS-C3750X-48PF-8 to twelve (12).
- 5. Provide a credit to reduce the total of "Analog, non-app device add-on for UWL", model number L-ANLG-DEV-UWL to forty-eight (48).
- 6. Provide a credit to reduce the total of "UCSS for Analog Devices 1 user one year", model number UCSS-U-ANLG-1-1 to forty-eight (48).
- Provide a credit to reduce the total of "ESSENTIAL SW Analog, non-app device", model number CON-ESW-DEVUWL to forty-eight (48).
- 8. Provide a credit to reduce the total of "AC Power cord for catalyst 3K-X", model number CAB-3KX-AC to twenty-four (24).
- 9. Provide additional cost to provide one (1) model number L-UNITYCN8-LIC-UPG, "Unity Connection 8.x, SW feature license add-ons".
- 10. Provide additional cost to provide one (1) model number L-UNITYCN8-PAK "Unity connection 8.x PAK".

- Provide additional cost to provide one (1) model number CON-ESW-LUNITYCN "ESSENTIAL SW Unity connection 8.x, SW feature License".
- 12. Provide additional cost to provide four hundred (400) model number L-UNITYCN8-USR "ONE Unity connection 8.x User All user features eDelivery".
- 13. Provide additional cost to provide four hundred (400) model number CON-ESW-UNCN8R "ESSENTIAL SW One Unity Con8.x User All user features".
- 14. Provide additional cost to provide four hundred (400) model number UCSS-U-MSG-1-1 "UCSS for Unity or Unity Connection 1 user one year sub".
- 15. Provide additional cost to provide one (1) model number L-UNITYCN8-LIC-UPG

The following items pertains to the security package provided by WW Gay Integrated Systems.

- 1. Provide a credit for the complete card access badging station to include badging camera, tripod, photo back drop, card printer and badging PC workstation.
- 2. Provide a credit for the video storage for the video storage server.
- 3. Provide a credit for the PC workstation, CCTV Workstation.
- 4. Provide a credit for the cisco 3560G-24TS switches.
- 5. Provide a credit for the rack mount UPS units, APC SMT1500.

Please also download and refer to the revised drawings issued as part of this CPR in the Sendfile link in the accompanying email.

Please submit your extra, credit or no change proposal for the proposed change(s) described herein. Proposal shall be in itemized cost breakdown form with subcontractor's proposal(s) in itemized cost breakdown form attached. Proposals shall include all work related and incidental to the change and necessary to properly complete the work. The work shall be in accordance with the requirements of the contract documents unless otherwise specified or indicated herein. Proposals and all exhibits shall be referenced with this CPR identification. This is not an order to proceed with this change. If your proposal is accepted, a Change Order will be issued. If your proposal is not received on or before 10 days it shall be deemed that you have waived claim for change in contract amount or time.

End of CPR
