Narrative

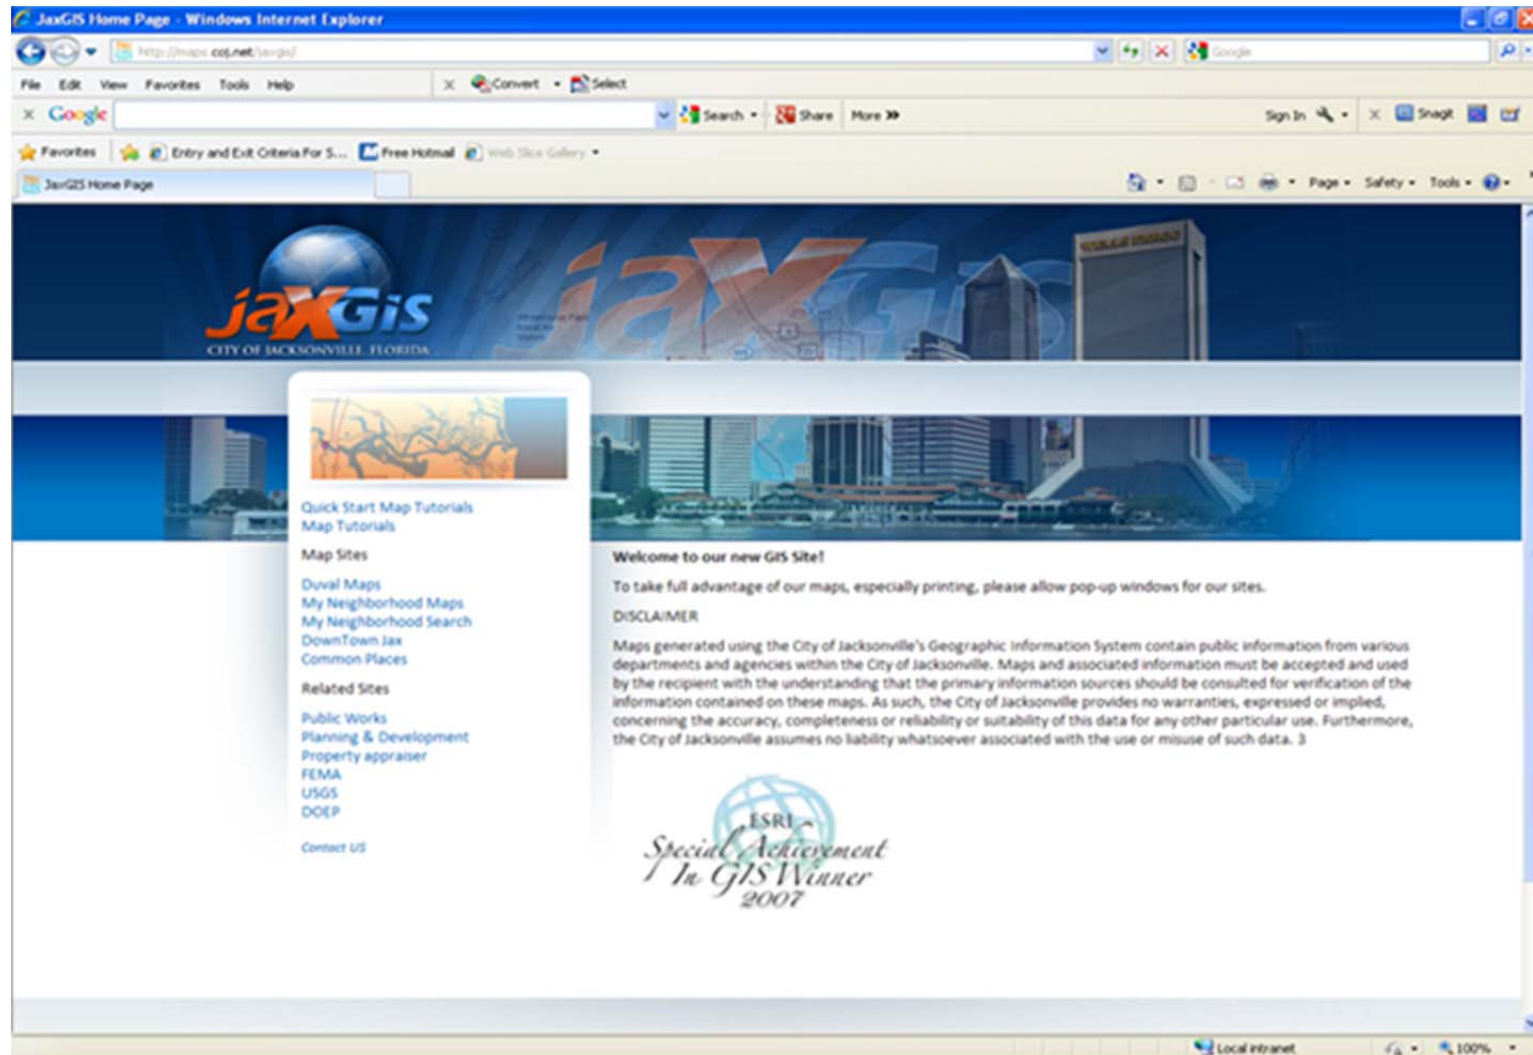

Information. We need it to live, work and play. The City of Jacksonville makes access to information a little easier. How? By way of the city's coj.net website. The official website for the City of Jacksonville, coj.net, launched in 2003 and has continued to be a consummate source of information for the citizens of Jacksonville. The website averages 5 million hits per quarter.

As citizens become savvier and technology advances provide endless possibilities, the city has looked for opportunities to improve coj.net by providing easy access to information without delay. The site offers a sleek look within a mobile-friendly layout, allowing citizens to access information from almost anywhere, anytime. In addition, citizens will find a standardized look and feel that will offer common navigation throughout; providing a straightforward site experience.

Social interaction has become a key focus and the city has worked to incorporate this form of communication within its site. The site offers links to City of Jacksonville Facebook, Twitter and Flickr accounts. With future rollouts, coj.net will emphasize social media integration.

Duval Maps – another helpful site that can be found as part of the coj.net suite is Duval Maps. This site alone has 5.4 million hits per quarter. Duval Maps is an online map website beneficial for almost everyone from citizens to many types of professionals. www.maps.coj.net

The Duval Maps site contains a large collection of geographic information, including:

- Search for property by address, RE#, or owner name
- Property sales data for past 4 years
- Land use designations & data
- Topographical land contours
- High quality imagery from top view as well as 40 degree angle
- Flexible ability to zoom
- Census Tract Zones & data
- Planning Districts
- Waste Hauler Zones
- Zip Codes
- Current and Proposed Flood Zones
- Evacuation Routes & Zones
- Street names and relevant ranges
- Measuring distance tool for any features on the ground
- Property owner data
- Zoning designations & data
- 5 years of aerial imagery
- Military and Civilian Flight Hazard Zones
- City buildings
- Council Districts
- CPAC's
- Streets & drainage areas
- Ash sites
- Neighborhood boundaries & names
- Airport Noise Zones
- Hurricane debris cleanup grid

In addition, this site allows business and citizen users to look up, learn, research and understand many different elements of our county, which can be used for anything from fun to development.

The site's frequency of use by professionals in the insurance, real estate, retail and other industries demonstrates its value to our local economy. It has been documented by several types of local businesses and industry associations that this site is used in their day-to-day operations.
